

How to reset Password in Hyundai Next Gen devices:

Use a PC connected to a Switch in the same LAN as the Hyundai device.
Open SADP tool:

- 1) Select the device that password must be restored from the list
- 2) Select "forgot password" option in the lower right side of the window

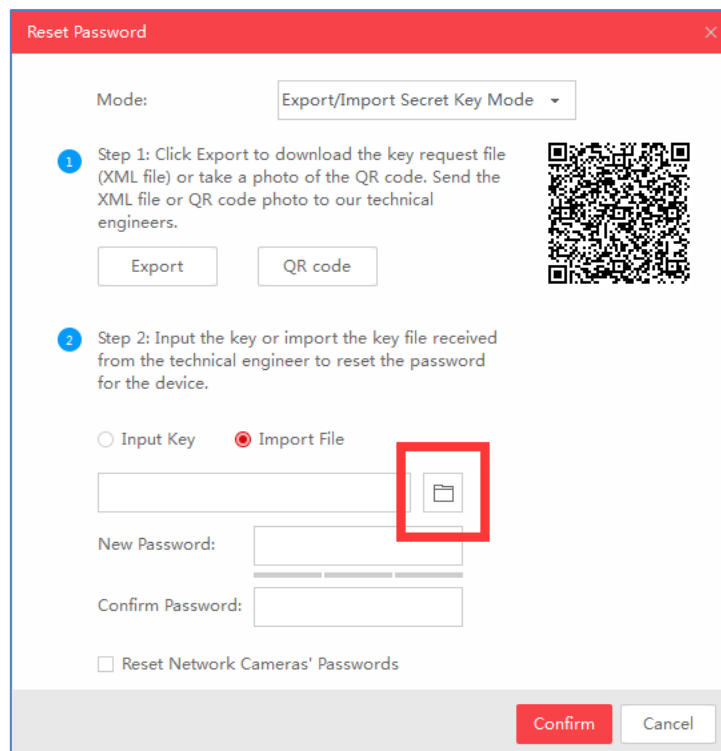

- 3) Press "Export" button and save the XML file in your PC (Desktop by default).

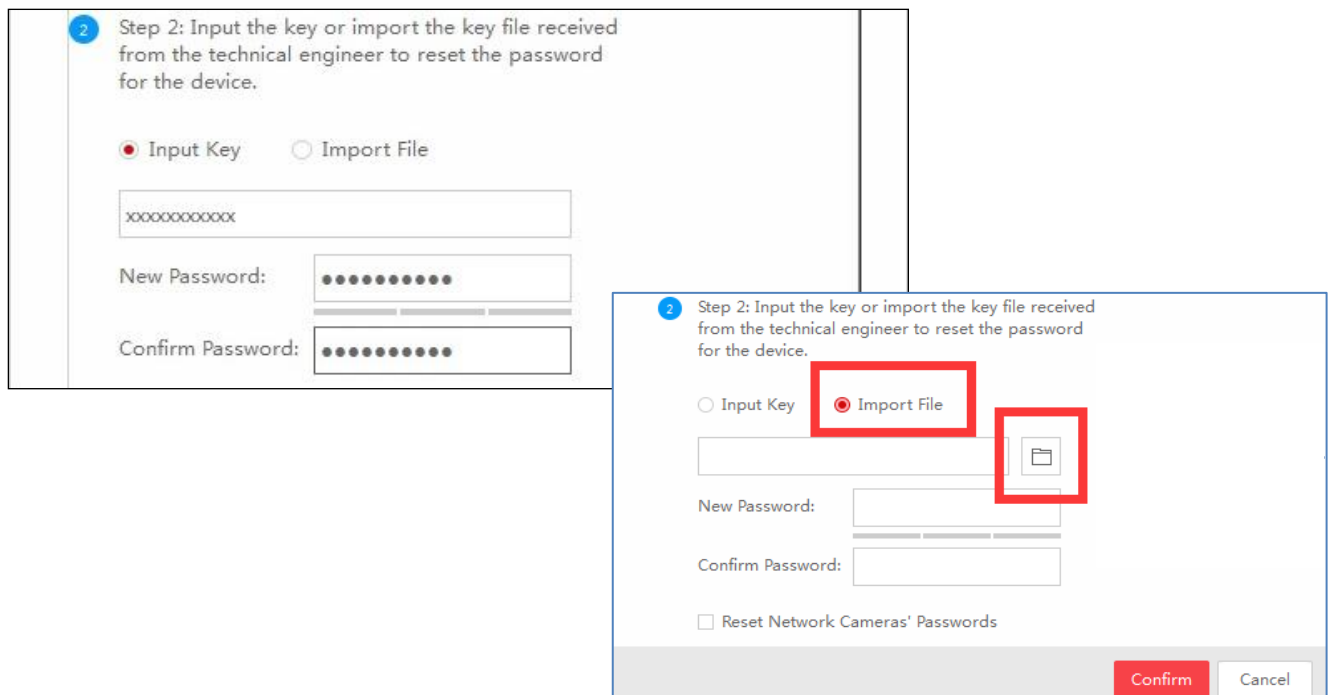

- 4) Send the XML file to your salesman email address with your company details, too.

- 5) Within 24 hours we will try to replay you with a key number.
- 6) Open SADP tool again

- 7) Select **“Input File”** (If XML file is attached in our replay) or **“Input Key”** (If code we gave you some code list)

- 8) Select **“Confirm”** and you can generate a new password for your system.
